FROM

THE SURGEON GENERAL WITH THE
GOVERNMENT OF BOMBAY;

TO

THE CHIEF SECRETARY TO GOVERNMENT,
General Department
Bombay.

Bombay, 18th March 1896.

SIR,

I have the honour to forward, for the information of Government, the annual Administration Report on the Lunatic Asylums for 1895.

2. The Public Works Department have carried out the usual repairs during the year.

3. *At Colába* the cost of repairs to the building amounted to Rs. 4,847-10-4 as compared with Rs. 4,513-15-0 in the previous year. Two latrines have been constructed during the year, as a tentative measure, at a cost of Rs. 199-9-2 by the Public Works Department.

4. *At Ratnágiri* sleeping barracks, cells, hospitals, &c., are in good order, but it is impossible to keep them as "sweet" as could be desired on account of insufficient water for washing them and the badly arranged night urinals. Plans and estimates for improving these defects, for heightening a compound wall between the male and female portions of the asylum, for enlarging the cook-rooms and for making additional cells have been prepared and submitted to Government, but these have not yet been sanctioned.

5. *At Poona* the two old padded cells which have been practically useless for a considerable period, were converted at a cost of Rs. 40 into ordinary cells. One of these is now being used as a reading-room and a few of the lunatics who wish quietness resort regularly to it. The enclosed passage between the front buildings has been altered into a store-room and provided with a door and windows. For some years the floor of the grinding-room, being merely clay, was difficult to keep clean and free from dust; now it has been cemented at a cost of Rs. 60, which renders the flour of a purer quality.

6. *At Dhárwár* plans and estimates for quarters for the warders and servants have been approved and sanctioned by Government as stated in the last year's report, but the Public Works Department will not, it is presumed, be able to complete the buildings before the end of the financial year. The alterations to the female yard and the building of a verandah and wall to isolate the present female day-room are being carried out, and three of the single cells will now open into the female airing ground instead of into the male side of the asylum as formerly.

7. *At Ahmedabad* the widening of the verandahs has been sanctioned, though this cannot be done without raising the roof, as widening of the verandahs under the present circumstances will lower the roof and lowering of the roof will facilitate the escape of lunatics. Two day sheds have been sanctioned and will be provided during the year.

8. *At Hyderabad* there has been no change in the buildings during the year, except that a gate has been put up between two court-yards, thus providing separate accommodation for criminal lunatics.

9. The water-supply is good and abundant. *At Colába*, the auxiliary tank is almost always full and met the requirements of the institution. The Municipi-

pality at Ratnágiri have not as yet supplied the sanctioned quantity of 4,000 gallons per diem as stipulated in Government Resolution No. 156 C.W.—623 of 1889. The present supply is only 1,500 gallons per day.

10. The undermentioned works were executed and paid for out of the Surgeon-General's discretionary grant at the lunatic asylums during the year 1895 :—

	Rs.
Improving the arrangements for the water-supply at the Lunatic Asylum, Dhárwár	28
Erecting a <i>pukka</i> teak iron-barred gate between the barracks in the Lunatic Asylum, Hyderabad	123
Making cement paving to the floor of the grinding-room at the Lunatic Asylum, Poona	60
Renewing padding from the old padded cells and converting them into an ordinary cell at the Lunatic Asylum, Poona	40
Converting closed passage between the two front buildings into a store-room at the Lunatic Asylum, Poona	131
Laying down pipes for supplying drinking water from the municipal water-works at the Lunatic Asylum, Ahmedabad	394
Providing additions and alterations in cook-rooms for improved cooking arrangement at the Lunatic Asylum, Ahmedabad	250
	Rs. ... 1,026

11. On the statistical statements appended at the end of the Report, I beg to make the following remarks :—

Statement No. I shows that the total population of the asylums during the year under report was 978, or 22 less than in the previous year. Of these, 804 were males and 174 females as compared with 808 males and 192 females in 1894. On 1st January 1895 there remained 566 males and 141 females, 220 males and 31 females were admitted, and 18 males and 2 females re-admitted; 65 males and 15 females were discharged cured, 98 males and 13 females transferred to the care of friends (82 males and 8 females improved and 16 males and 5 females not improved), and 5 males discharged otherwise (1 escaped, 1 transferred from the criminal to the civil list and 1 from the non-criminal to the criminal list, and 2 handed over to the care of their relations by order of the Magistrate. 58 males and 10 females died against 79 males and 22 females in 1894. At the close of the year there remained 578 males and 136 females—total 714 as compared with 707 (566 males and 141 females) in the preceding year. The daily average strength was 581·5 males and 136·1 females—total 717·6 against 727·5 (males 583·1 and females 144·4) in 1894.

The percentages of cures and deaths to the daily average strength were —

Cured	...	{	Males	...	...	...	11·1	}	Total	...	11·1
			Females	...	...	...	11·0	}			
Died	...	{	Males	...	...	...	9·9	}	Total	...	9·4
			Females	...	...	...	7·3	}			

The percentages to admissions were—

Cured	...	{	Males	...	...	...	27·3	}	Total	...	29·5
			Females	...	...	...	45·4	}			
Died	...	{	Males	...	...	...	24·3	}	Total	...	25·0
			Females	...	...	...	30·3	}			

Statement No. II gives details of criminal lunatics. At the beginning of the year there had remained 91 males and 10 females, 24 males were admitted and 1 male was re-admitted, making a total of 116 males and 10 females—a grand total of 126 in all confined as compared with 130 (males 118 and females 12) in the previous year. Of these, 11 males were discharged, transferred, &c., and 8 males died, leaving 97 males and 10 females—total 107 on 31st December 1895. The daily average strength of these insanes was 95·0 males and 10·0 females—total 105·0 against 107·1 (males 97·7 and females 9·4) in the preceding year.

Particulars of the different kinds of these insanes are given in the following table:—

Kind of Criminal Lunatics.	Colába.	Ratná-giri.	Poona.	Dhár-wár.	Ahmed-abad.	Hyder-abad (Sir Cowasji Jehán-gir).	Total.
Those tried and acquitted on the ground of insanity	13	9	...	...	5	3	30
Those insane on admission and found to be incapable of making a defence ...	32	16	4	4	9	9	74
Those who became insane during imprisonment	7	1	2	5	4	3	22
Total ...	52	26	6	9	18	15	126

Statement No. III shows the religion, sex and residence of the lunatic, admitted during the year. Of the 271 admissions and re-admissions, 56 were Christians (40 Europeans, 4 Eurasians and 12 Native Christians), 133 Hindus 63 Mahomedans and 19 of other castes. Of the 29 European military insanes 14 came from Bombay, 11 from Bengal and 4 from Madras. Of the 7 civilian admissions, 4 were from Bombay, 2 from Bengal and 1 from Madras. The remaining 4 Europeans were sailors brought from the Bombay Harbour.

Statement No. IV is a return showing the previous occupations of the insanes admitted during the year under review. Beggars and mendicants furnished, as usual, the largest number of admissions, *viz.* 71; cultivators and labourers numbered 30, soldiers 29, merchants and traders 31 and domestic servants 12. In 8 cases the occupation was not ascertained and 35 had no occupation.

Statement No. V shows the ages of the lunatics admitted according to sex. There were 12 insanes (males 11 and female 1) under the age of 20, 209 (males 187 and females 22) between 20 and 40, 48 (males 38 and females 10) between 40 and 60, and 2 (both males) above 60 years of age.

Statement No. VI gives the details of the various types of insanity, and the following table shows the types of insanity with the result of the treatment of each form:—

	Remained.	Admitted.	Total.	Recovered.	Improved.	Died.
Mania	294	121	415	40	42	31
Melancholia	80	66	146	15	15	10
Dementia	127	23	150	...	10	11
Idiocy	35	8	43	1	1	4
Epileptic insanity	26	12	38	1	3	6
Charas smoking	5	5	10	4	...	...
Gánja smoking	75	19	94	11	8	3
Use of bháng	23	2	25	3	3	1
Opium smoking	...	...	...	...	...	...
Opium eating	4	...	4	1	...	...
Spirit drinking	24	13	37	3	8	1
Other types	14	2	16	1	...	1
Total ...	707	271	978	80	90	68

Statement No. VII gives the alleged causes of insanity among the lunatics. Of the 978 insanes confined in the asylums, a cause is given in 460 cases and is unknown in 518. Of the known causes, 396 are attributed to physical and 64 to moral causes. Of the former, the use of intoxicating drugs and abuse of spirits

accounted for 170 cases, previous attacks are credited with 52, epilepsy 38, hereditary causes 32, fever 24, congenital disease 23, masturbation 13, destitution 10, injury to head 8, sun-stroke 6, syphilis and climate 5 each, child-birth 4, sexual excess 3 and paralysis, uterine disease and old age 1 each. Of the moral causes, grief is the alleged cause in 33 cases, anger and study in 6 each, fear, religion and anxiety in 5 each, jealousy in 3 and loss of money in 1. The following are the causes, as far as they can be ascertained, leading to insanity in persons charged with crimes of violence:—

Ganja smoking	...	...	...	...	8
Opium eating	...	...	...	...	1
Fever	...	...	...	...	2
Fever and persistent headache	...	...	...	...	1
Puerperal fever	...	...	...	...	1
Epilepsy	...	...	...	...	5
Injury to head	...	...	...	...	1
Hereditary	...	...	...	...	1
Grief	...	...	...	...	2
Anger	...	...	...	...	2
Previous attack	...	...	...	...	1

No cause could be given in 23 cases.

Statement No. VIII is a return of sick insanes treated in the asylum hospitals for diseases other than insanity. On the 1st January 1895 there had remained 41 patients under treatment and 368 were admitted, giving a total of 409 as compared with 485 in the previous year. Of these, 289 were cured, 10 discharged otherwise (8 transferred to the care of friends and 2 relieved) and 68 died, leaving 42 on the sick roll on 31st December 1895. The daily average sick was 44·8 against 48·4 in 1894. Ague, dysentery, debility, diarrhœa, epilepsy and chronic pneumonic phthisis were the chief causes of admissions. Of the 68 deaths, 13 were due to chronic pneumonic phthisis, 12 to dysentery, 8 each to epilepsy and Bright's disease, 4 each to paralysis and pneumonia, 3 to cholera, 2 each to ague, heat apoplexy, bronchitis and diarrhœa and 1 each to influenza, remittent fever, secondary syphilis, old age and debility, anæmia, dropsy, hemiplegia and fatty degeneration of heart.

The following table gives the ratio of deaths per mille to the average daily strength and the total population of each of the asylums as compared with that of the previous year:—

			Average daily strength.	Total population.	Number of deaths.	RATIO OF DEATHS PER MILLE TO	
						Average daily strength.	Total Population.
Colába ...	1895	...	283·0	417	35	123·7	83·9
	1894	...	287·6	445	41	142·6	92·1
Ratnágiri ...	1895	...	98·4	108	3	30·5	27·8
	1894	...	96·6	108	5	51·8	46·3
Poona ...	1895	...	85·5	140	18	210·5	128·6
	1894	...	95·0	147	32	336·8	217·7
Dhárwár ...	1895	...	46·0	54	2	43·5	37·0
	1894	...	38·0	44	1	26·3	22·7
Ahmedabad ...	1895	...	105·7	119	3	28·4	25·2
	1894	...	105·3	120	5	47·5	41·7
Hyderabad (Sir Cowasji Jehángir)	1895	...	99·0	140	7	70·7	50·0
	1894	...	105·0	136	17	161·9	125·0
Total ...	1895	...	717·6	978	68	94·7	69·5
	1894	...	727·5	1,000	101	138·8	101·0

From the above it will be seen that the death-rate in all the asylums excepting Dhárwár shows a marked decrease over the previous year. At Colába there were 35 deaths (3 Europeans and 32 natives), or 6 less than in the preceding year, giving a ratio of 83·9 deaths per mille of the total population as compared with 92·1 in 1894. The mortality among the Europeans was at the rate of 44·8 per mille of the total population against 36·6 in the previous year, and was due to chronic pneumonic phthisis, paralysis and Bright's disease. The case of chronic pneumonic phthisis was in the asylum for a very long time suffering from chronic dementia. He was much enervated by the long confinement which was necessarily entailed, and the disease subsequently culminated in tubercular deposit, and a fatal termination by chronic pneumonic phthisis ensued. The case of paralysis was also a long resident of the asylum, and he had been ailing from right hemiplegia prior to his admission into the asylum, which latterly took the form of a general character and ended fatally by exhaustion. The case of Bright's disease was a woman who was also a long resident and had been suffering from chronic mania with exacerbations of much excitement and impulsiveness. She had been suffering from an abnormal condition of the kidneys with dilatation of the left cavities of the heart for some time, and general dropsy eventually intervened, rendering treatment of little avail. Among the natives the total number of deaths was 32 against 38 in the previous year, making a death-rate of 91·4 per mille of the total population against 104·7 in 1894, and was due chiefly to chronic pneumonic phthisis, dysentery, epilepsy and Bright's disease. Seven of these cases were brought in by the police, and these were found on admission into the asylum to be suffering from much exhaustion by privations and ailing from an advanced stage of the disease, chiefly from dysentery, chronic pneumonic phthisis and Bright's disease. Others were more or less old residents of the asylum who had been suffering from anæmia and debility for some time, and all such cases have succumbed to the prevailing diseases.

At Ratnágiri the number of deaths was 3 against 5 in 1894, and the ratio per mille of the total population was 27·8 as compared with 46·3 of the previous year. The causes of deaths were dysentery, hemiplegia and anæmia. The one who died of acute dysentery was indifferent in health and suffering from diarrhoea on admission into the asylum on 29th October 1893 and was dirty and unmanageable. He was admitted into the asylum hospital on account of acute dysentery on 2nd August 1895 and died on 7th idem. The case of hemiplegia was an old man, aged 82, who was transferred from the Colába Lunatic Asylum, Bombay. On admission he was declared to be in a broken state of health. He suffered from dysentery on 31st July 1895 and was discharged cured on the 5th August 1895. Again, he was admitted into the asylum hospital for hemiplegia of right side and cerebral apoplexy on 11th August 1895 and, losing power of deglutition, died two days after. The case of anæmia was a female who was a dirt-eater and whose health on admission was stated to be fair. She had suffered from hemiplegia and epilepsy of long standing and was admitted into the asylum hospital on 16th August 1895 for general œdema to which she succumbed on 15th September 1895.

The Poona Asylum shows a decrease of 14 deaths over the previous year. With the exception of those who died of cholera, *viz.* 3, most of the deaths occurred among patients whose health had been previously in a more or less broken-down condition, many being reported in an indifferent or a bad state of health on admission into the asylum. Of the 18 deaths, 3 each were from cholera, epilepsy and general paralysis, 2 each from Bright's disease, chronic bronchitis associated with debility and malarial fevers, 1 each from chronic diarrhoea, old age and secondary syphilis. The 3 cases of cholera occurred during the outbreak, and directly the disease manifested itself the patients were transferred for treatment to the Sassoon General Hospital where they died; the duration of the disease in the three cases varied from 4 hours to 2 days and 11 hours. Five cases, *viz.* 3 of general paralysis, 1 of epilepsy and 1 of albuminuria, were admitted into the asylum in a bad state of health and were directly transferred to the sick list. 2 of these died within a fortnight of admission, 2 within seven weeks, and 1 after six months and 20 days. The ratio of deaths per mille to the total population was 128·6 against 217·7 in 1894.

At Dhárwár there were 2 deaths as compared with 1 in 1894, giving a death-rate of 37·0 per mille of the total population against 22·7 in the preceding year. The one who died of influenza was admitted for severe epileptic fits on the 7th November 1895, afterwards diarrhœa set in with fever and severe bronchial catarrh. He gradually sank from exhaustion and died on the 25th idem. In the second case the patient was admitted for dysentery on 16th December 1895, and though he improved temporarily under treatment, he afterwards became gradually weaker and sank on the 29th of the same month.

At the Ahmedabad Asylum there were 3 deaths, or 2 less than in the previous year, and the ratio per mille of the total population was 25·2 as compared with 41·7 in 1894. The casualty in two cases resulted from pneumonia; one of these was an old man aged 55, with a weak constitution, who had been subject to fits of maniacal excitement and was upwards of three-years in the asylum. The other case was apparently in a good condition of bodily health, but an acute attack of pneumonia proved fatal in his case in 10 days. The third was a man who had spent nearly 22 years in the asylum; he was suffering from phthisis and partial paralysis for some time and died after remaining five months on the sick list.

The Sir Cowasji Jehangir Asylum at Hyderabad shows a decrease of 10 deaths over the preceding year. The mortality was at the rate of 50·0 per mille of the total population as compared with 125·0 in 1894. The causes of deaths were pneumonia and heat apoplexy 2 each and diarrhœa, remittent fever and fatty degeneration of heart 1 each. This is the smallest number of deaths since the year 1885 and was, in a great measure, owing to the year under review being an exceedingly healthy one. There were no inundations, the rainfall was scanty and the temperature was, as a rule, much higher than that of the previous year. The improvement may also be attributed to some extent to the fact that the inmates have been made to wear their clothing which they do now in most cases very willingly. They are thus not so much exposed as they were in previous years.

Statement No. IX is the cash account of the asylums during the year under review. The heading of column No. 4 of the statement has been modified, as ordered by the Government of India in their letter No. 26-Medl.-849, dated 16th November 1895, Home Department (Medical), embodied in the Bombay Government Resolution No 5470, dated 16th December 1895, General Department. The total income was Rs. 1,36,200-2-0. Of this, Rs. 1,09,208-7-6 were received from the Treasury, Rs. 13,908-2-10 from paying patients, Rs. 2,372-5-8 from the Manufacturing Department, being the value at market rates less cost of raw materials of articles supplied to the asylums and sold to the public and labour of insanes on trees, and Rs. 10,650-7-6 were "book receipts" on account of works done by the Public Works Department and supply of stationery, forms and Europe medicines, &c.; the corresponding figures for the previous year being Rs. 1,09,781-7-2, Rs. 13,781-5-3, Rs. 2,801-1-11 and Rs. 11,014-4-11, respectively. Rs. 60-10-6 were realized by the sale of unserviceable articles as compared with Rs. 98-11-7 in 1894.

The total expenditure amounted to Rs. 1,36,135-15-1 against Rs. 1,37,477-10-10 in 1894. The cost on establishment was Rs. 48,691-1-11 as compared with Rs. 46,594-14-6 in the preceding year, the increase being due to the increased rate of allowances to the Superintendent of the Dhárwár Lunatic Asylum and to the entertainment of additional establishment in the Poona and Dhárwár Asylums. Rs. 47,914-3-4 were expended on diets, or Rs. 2,177-5-5 less than in 1894. Clothing and bedding cost Rs. 5,313-14-2, the increase of Rs. 593-7-1 over the previous year being attributed to the purchase of new clothing and bedding at Poona, Colába and Hyderabad Asylums to replace old and worn-out ones. The expenditure on medicines amounted to Rs. 1,898-9-10 as compared with Rs. 1,614-3-5 in 1894, the increase being due to the charges on account of a portion of medical stores supplied to the Ratnágiri, Dhárwár and Ahmedabad Asylums during the year 1894 being paid in the year under report. There is a decrease of Rs. 1,131-0-7 in the cost of contingencies over the preceding year.

If the amounts of Rs. 13,886-10-10 received from paying patients, Rs. 1,320-4-0 on account of the sale of manufactured goods and labour on trees

and Rs. 60-10-6, the sale-proceeds of unserviceable articles, remitted into the Treasury, and Rs. 1,009-6-9 on account of manufactured goods made over to asylums for asylum purposes,—total Rs. 16,277-0-1, be deducted from the amounts received from the Treasury and adjusted to Government as “book charges,” the net expenditure to Government will be Rs. 1,03,581-14-11 and the net cost per head of daily average strength Rs. 144-5-6 as compared with Rs. 1,04,113-13-4 and Rs. 143-1-9 respectively in 1894.

The following is the abstract of cash account required by the Government of India as per their memorandum No. 9-Medl.-499, dated 25th July 1890, Home Department, Medical, embodied in the Bombay Government Resolution No. 3149, dated 9th August 1890, General Department:—

With reference to paragraph 7 of Government Resolution No. 2714, dated 2nd July 1895, General Department, reviewing the Annual Administration and Progress Report on the Lunatic Asylums of the Bombay Presidency for the year 1894, I would point out that it is not always possible to explain the variations in the expenditure under different heads at the lunatic asylums, because (a) the market prices of articles in different districts vary and (b) the average number of insanes in the different asylums vary considerably, which affects the cost per head of daily average strength under all heads, and a larger number of daily average strength reduces the cost per head; or, in other words, a larger asylum can be worked cheaper than a small one. With regard to fluctuations at different asylums in clothing and bedding, any great fluctuation is generally due to specific causes, such causes being always noted in the body of the Report where Statement No. IX is reviewed.

The fluctuation in the cost of “medicines” is very trifling, except at Hyderabad. The small cost at that asylum was due to the year being a very healthy one and there being consequently a smaller expenditure.

The remarks made at the beginning on the Government Resolution quoted above fully explain any fluctuations under the heading “Contingencies.”

Statement No. X shows the sanctioned establishment as it stood on 31st December 1895. The monthly cost was Rs. 3,937-8-0, showing an increase of Rs. 88-8-0 over the previous year, due to the increased rate of pay to the

Steward of the Colába Asylum and allowance to the Superintendent of the Dhárwár Asylum and to the entertainment of the extra establishment at the Poona Asylum.

Statement No. XI gives receipts and expenditure of the manufacturing Department. The total credits amounted to Rs. 3,109-12-3 and debits to Rs. 2,027-12-8, giving a profit of Rs. 1,081-15-7 against Rs. 1,258-9-6 in the previous year. The average number of insanes employed during the year was 276.1 males and 65.2 females—total 341.1 as compared with 313.3 (males 254.6 and females 58.7) in 1894. In calculating the percentage of the lunatics employed, those employed as supplementary servants of the asylums have also been included in this statement, but the estimated value of their labour has not been taken into account.

Statement No. XII gives the condition of the lunatics as to caste, sex and marriage, and is summarized in the following tables :—

Table I.

		TOTAL NUMBER.									PERCENTAGE OF					
		Treated.			Cured.			Died.			Cured to treated.			Deaths to treated.

Statement No. XIII shows particulars regarding criminal insanes. The nature of the crimes were theft 27, culpable homicide amounting to murder 43,

culpable homicide not amounting to murder 7, suicide 4, voluntarily causing grievous hurt 14, house-breaking 6, mischief and assault 9 and miscellaneous offences 16.

12. The official visitors were regular in their attendance at all the asylums except Colába, where in May 1895 the Commissioner of Police for the City of Bombay was unavoidably absent, but no substitute was provided as required by Government Resolution, General Department, No. 104, dated 12th January 1874.

13. The Sir Cowasji Jehángir Lunatic Asylum at Hyderabad was inspected by the Principal Medical Officer, Sind District, on 21st September 1895 and found in good order. Surgeon Major-General P. S. Turnbull left the following notes giving the results of his inspection tour:—

18th October 1895.—Inspected the Poona Lunatic Asylum and found it in order, many minor defects having been remedied during the year. Sheds for use during the day are required, and improved drainage all round the institution.

12th December 1895.—Inspected the Dhárwár Lunatic Asylum and found it in admirable order—clean and neat throughout. Much has been done to improve the asylum during the past three years, but still a good deal remains to be done to make it complete. Warders' quarters are wanting, and some alterations in the asylum buildings proper. To these Government sanction has been given, and it is hoped they will soon be carried out.

14th January 1896.—Inspected the Lunatic Asylum at Ahmedabad and found all in as good order as is possible in buildings which are structurally defective.

15. The Colába Asylum was inspected on the 13th March 1896. Everything there was found in the neatest and most orderly condition that the circumstances admitted of. The patients were clean and well clad, the books in excellent order and up to date; the medicines and instruments carefully arranged and kept in good condition, and the premises extremely clean and tidy. As is well known, the buildings as a whole are unsuitable in many respects, but as a new asylum is in course of construction, no further comment on this subject is needed.

16. It gives me great pleasure to report that the Superintendents of all the asylums performed their duties most efficiently throughout the year.

I have the honour to be,

Sir,

Your most obedient Servant,

H. COOK, M.D., Surgeon Major-General,
Surgeon-General with the Government of Bombay.

133281

The capacity of the Dhárwár Lunatic Asylum is, at 50 superficial feet per patient, 64 males and 24 females.

The maximum number of linatics confined on any one night was 39 males and 11 females.

This is the cell accommodation:—

10	do	of 1,450	do	of 88	do	10	do
18 cells have each cubic capacity of 1,450 feet, and a superficial area of 123 square feet—36 patients.							

10, do, of 1,400 do, of 88 do, 10 do,
 1 night barrack has cubic capacity of 14,596 feet and a superficial area of 1,210 square feet—24 do

I night barrack has cubic capacity of 14,326 feet and a superficial area of 1,210 square feet—24 do.
I night barrack has cubic capacity of 10,804 feet, and a superficial area of 900 square feet—18 do.

Annual Reports.—

Report on the Lunatic Asylums in
the Bombay Presidency for the
year 1895.

General Department.
No. 2194

Bombay Castle,
15th May 1896.

Letter from the Surgeon General with the Government of Bombay, No. S.B.—406,
dated 20th April 1896—

Submitting the annual report on the Lunatic Asylums in the Bombay Presidency for
the year 1895.

RESOLUTION.—This report is clear and concise and calls for little comment.
The year was generally uneventful, but it is observed that there were again a
few cases of cholera at the Poona Asylum, the question of changing the site
whereof has been under consideration. The health of the insanes generally
was better than in the previous year and the death rate appreciably decreased.

2. Both the total asylum population and the average daily strength
somewhat decreased. There was a decrease from 95 to 85·5 in the average
daily strength at Poona, from 105 to 99 in that at Hyderabad, and an increase
from 38 to 46 in that at Dhárwár. The Ahmedabad Asylum, alterations and
extensions whereof are under consideration, was as usual very fully utilized.

3. Though there was not much change in total expenditure, there were,
as in the previous year, considerable fluctuations at some of the asylums, the
most noticeable being decreases of contingent expenditure from 6,319 to 4,881
at Colába and from 924 to 643 at Poona, and increases in establishment charges
from 1,692 to 2,933 at Dhárwár, and in contingent expenditure from 363 to 941
at Ahmedabad.

J. DE C. ATKINS,
Secretary to Government.

To

The Surgeon General with the Government of Bombay, The Sanitary Commissioner for the Government of Bombay, The Commissioner in Sind, The Commissioner, N. D., The Commissioner, C. D., The Commissioner, S. D., The Collectors of Ahmedabad, Poona, Dhárwár and Ratnágiri, The Judicial Department of the Secretariat, The Public Works Department of the Secretariat, The Editors' Table, Bombay, The Editors' Table, Poona, <i>care of</i> the City Magistrate, Poona, The Editor of the <i>Dhárwár Vritt</i> (for his own use and for the use of the Editors of other newspapers in Dhárwár), The Editors' Table, Belgaum, <i>care of</i> the Secretary, Belgaum Muni- cipality, The Government of India, The Secretary of State for India.	}	With copies of the report.
	}	By letter.
